The Principal

ILS Law College, Pune

Dear Madam,

We are glad to acknowledge the valuable contribution that students of ILS Law College, Pune made during their internship from 16 May to 23 May 2018 to work with Narmada Bachao Andolan.

They studied, analysed and applied the law, policies and judgments related to the resettlement and rehabilitation of Sardar Sarovar and Narmada Dam projects. They received orientation on the issues related to development planning and paradigm.

They were engaged in the task of data gathering related to the legal action against violations of fundamental rights of the project-affected. They worked in the field with farmers, labourers, fish workers, artisans and others, helping them to know the legal bases, their rights and articulate their grievances. The surveys they carried out have provided us with ample data to proceed further to seek justice.

The ILS young students team was indeed very hardworking, committed and well disciplined. They could adjust to all inadequacies, infrastructural deficiencies and rural surroundings quite well. The leadership from amongst them worked conscientiously to keep the team spirit high throughout the period of 7 days of their stay in the Narmada Valley.

We are thankful to ILS for the support through internship and hope the relationship developed will continue in the future too.

With regards,

Medha Patkar and colleagues
