This title is not currently available on inspection

A central theme of law and society is that people's ideas about law and the decisions they make to mobilize law are shaped by community norms and cultural context. But this was not always an established concept. Among the first empirical pieces to articulate this theory was David Engel's 1984 article, 'The Oven Bird's Song: Insiders, Outsiders, and Personal Injuries in an American Community'. Over thirty years later, this article is now widely considered to be part of the law and society canon. This book argues that Engel's article succeeds so brilliantly because it integrates a wide variety of issues, such as cultural transformation, attitudes about law, dispute processing, legal consciousness, rights mobilization, inclusion and exclusion, and inequality. Contributors to this volume explore the influence of Engel's important work, engaging with the possibilities in its challenging hypotheses and provocative omissions related to the legal system and legal process, class conflict and difference, and law in other cultures.

Subject: Donation of Books for Library

Dear Sir/Madam,

I am Dr. Arvinder Singh an MBBS, MD (Gold Medalist), IIM MBA (Gold Medalist) and also hold Diploma from Oxford, UK. Presently, working as CEO and CMD of Arth Diagnostics, Udaipur. I am pursuing LLB 3rd year and enrolled with National Law University, Bangalore for PG Diploma. My special interest is in medical law. Recently, I have written a book with the name of "**Handbook on Doctors and Law**". I am writing this letter to accept and place the book in your college library. It will help students to understand the duties and right of patients and doctors.

This book covers all the major topics of medical law in the light of the Indian law context. It is a short colored book, written in easy language and in pointwise fashion with highlights on important points.

Knowledge of Medical law is an emerging need, not just for those in the medical profession, but for everyone who is moved to better understand how healthcare system should work. Unfortunately, the nuances of medical law & ethics are not taught in the medical profession. Hence, doctors and paramedical unknowingly commit mistakes which are seen as negligence and invite legal suits.

On the other hand, knowledge of medical law is beneficial for law professionals too to remain on the 'right' side of the law in any eventuality. Hence, an effort is being made in this book to cover the most significant topics of medical law to avoid unnecessary litigation. This book will help to get a simple and quick overview of medical law.

This book is a particularly helpful reference for medical practitioners, paramedical staff, hospital administrators, lawyers, researchers, students and public in general.

Here I am sending 5 specimen copies (not for sale) for your college library with the hope that many students will get benefited through these books. Book and author details are given below.

Research Handbook on International Marine Environmental Law

Research Handbooks in Environmental Law series

Edited by Rosemary Rayfuse, Emerita Scientia Professor, Faculty of Law and Justice, UNSW Sydney, Australia

Publication Date: 2015 | ISBN: 978 178100 476 0 | Extent: 512 pp

This authoritative Handbook examines the current state and the future needs of international law in addressing the key activities that pose threats to the marine environment. Its chapters explore the legal framework for protection of the marine environment, pollution of the marine environment, seabed activities and the marine environment, protection of marine biodiversity, regional approaches to the protection of the marine environment and climate change and the marine environment. Each chapter goes beyond a survey of existing law to identify the shortcomings in the legal regime and areas of critical research needed to address these shortcomings. This book provides significant insights into contemporary issues surrounding the efficacy of the regime created by the 1982 Law of the Sea Convention and details the further work needed to ensure the design and implementation of effective regulation and management of human activities that affect the marine environment.
